## PRODUCT INFORMATION

### 1 Securitisation

In common with many other leading mortgage lenders throughout the world, we may decide to securitise some of our mortgages. The following is a summary of the main features of securitisation.

#### Why should mortgages be securitised?

Financial institutions are limited in the amount they are able to lend, by the level of their capital (e.g. shareholder's funds). In order to release capital to back future lending, mortgages may be transferred to an investor. This practise, which is known as securitisation, is used in the capital markets world-wide as an alternative to raising new capital by traditional routes such as share issues.

#### Who are the investors in these markets?

They include the world's major financial institutions and multinational corporations.

#### How does securitisation affect you?

Other than in certain circumstances, considered by us to be very unlikely in practice, you should not be aware of any effect from securitising your mortgage. This is because you will still deal with us in all matters relation to it, including the setting of interest rates.

#### Who do you contact for further information?

By signing the declaration, you indicate your agreement to the securitisation of your mortgage. If you would like more information, please contact the Bank.

### 2 Early repayment

There may be early repayment fees should you choose to repay your mortgage before the final repayment date or increase your monthly repayments so that the final repayment date is earlier than originally agreed. Further details are available upon request.

The FBN Group means First Bank of Nigeria Plc, its subsidiaries and associated companies.
